SUMMARY

Developer Relations leader who builds and scales developer communities for API-first platforms: a 2,000+ member Discord, a zero-downtime docs migration, and five years hosting Algolia DevCon. Currently focused on developer experience for AI agents, building conversational search with MCP and tool-calling agents and writing about agent-ready developer tooling. Deep security background from advising CISOs on cloud infrastructure and compliance.

CORE COMPETENCIES

Developer Community Building · Technical Documentation · API Integration & Support

JavaScript/React/Next.js · Python · Go · AWS Services & Security

DevOps/CI/CD · Developer Advocacy · Technical Writing · Public Speaking

AI Agents (MCP, Tool Use, Agentic Workflows, Evals; multi-model via Algolia Agent Studio, Claude daily for AI-assisted development) · **Security Architecture · Compliance Frameworks**

EXPERIENCE

Senior Manager, Developer Relations | Algolia | *August 2025 to present*

Lead Developer Advocate | Algolia | *August 2021 to August 2025*

- Lead the docs and developer advocacy teams (up to five direct reports: advocates, technical writers, developer marketers) for Algolia's API-first search platform
- Led the Algolia documentation migration from a homegrown platform to Mintlify with zero downtime
- Launched the Algolia Discord from 0 to 2,000+ active developers in one year
- Host Algolia DevCon, the annual developer conference, for five consecutive years (2026 edition on October 1), plus quarterly developer livestreams with 200-500 concurrent attendees
- Built a reusable agentic demo platform, [TCG Search](#), and deployed it at eight conferences in six months, including Microsoft Build, Gartner, Adobe Summit, Shoptalk and eTail, each in a week or less
- Published agent-focused engineering content: "We rewrote the Algolia CLI for AI agents" (419 views, a top-five Algolia engineering blog post for February to August 2026) and "Chat, meet the Searchbox" (267 views)
- Host live coding sessions with partners, cross-pollinating user communities, and built demo applications such as a video transcription search (avsearch)
- Produced the Quick Start video embedded in the getting-started docs (811 views in its first month)
- Claimed Algolia's library on Context7 and moved llms.txt to its canonical location so AI tools can read the docs
- Editor and coach for internal and external technical content, giving pre-publication feedback on blogs, tutorials and speaker sessions
- Spoke to Algolia's Aspiring Managers Program on moving from IC to manager

Senior Engineer, Developer Relations and Integrations | Bold Penguin | *March 2019 to August 2021*

- Built the Developers Portal that streamlined partner onboarding, and maintained the product documentation for integration partners from single agencies to large enterprises

- Advocated for partner-requested enhancements with product teams, improving API usability
- Wrote coding examples and best practices for integration partners

Senior Developer Advocate, AWS CloudFormation | Amazon Web Services | *August 2017 to March 2019*

- Reported to the service director and represented the developer community in service team planning, influencing the roadmap
- One of the two founding developers of **cfn-lint**, the open source CloudFormation template linter (2,600+ GitHub stars), including commissioning its logo and launch stickers
- Maintained CloudFormation's other open source repositories with an active contributor community
- Published best-practices content on the AWS management tools blog, including a guide to pre-commit validation with cfn-lint, and engaged enterprise customers at meetups and conferences on infrastructure as code

Security Solution Architect | Amazon Web Services | *April 2016 to August 2017*

- Advised CISOs and security practitioners across North America on security posture, and on PCI, HIPAA and SOC compliance in the cloud
- Reviewed customer network topologies and created AWS security labs for bootcamps, summits and loft events

Senior Professional Services Consultant | Amazon Web Services | *July 2013 to April 2016*

- Migrated large enterprises to AWS and integrated with on-premises systems through secure, repeatable deployments
- Built PCI-compliant infrastructure with Elastic Beanstalk, Packer, Puppet and CloudFormation, and a CI/CD pipeline for IAM governance with CodePipeline, Ansible and CloudFormation

SELECTED PROJECTS

- **Pokemon TCG Vending Machine Search**: conference-booth demo with React/InstantSearch, an Algolia Agent Studio chat agent with evals, a card scanner, and serverless APIs on Vercel and Supabase
- **Agent Studio CLI**: command-line tool for Algolia Agent Studio, from idea to working tool in a week
- **Video Transcription Search**: full-stack demo of video content indexing with real-time search insights
- **Hello MCP**: minimal MCP server over Streamable HTTP, with a companion tutorial

WRITING AND SPEAKING

- **Writing**: We rewrote the Algolia CLI for AI agents (2026), Chat, meet the Searchbox (2026), The Agent Factory (2026), Building a JavaScript "Hello, World" MCP server (398 views), Customizing Algolia React components with Tailwind classes, Feature Spotlight: Trends Models in Recommend, Git pre-commit validation of CloudFormation templates (AWS). More at dev.to/chuckm
- **Talks**: DevRelCon 2026, Blog While the Context is Fresh · Haystack US 2025 lightning talk, Agentic query understanding using search MCPs · AWS re:Invent 2018, Deployment Scenarios with AWS CloudFormation (11,000+ views) · Search relevance panel, Finding out what's best
- **Live coding and community**: Adding search insights to InstantSearch applications (2,000+ views) · Fireside chat, Algolia-Hyvä integration on Magento 2 · The WebDev Challenge, Future of AI-native UX

EDUCATION

Bachelor of Science, Mathematics and Computer Science

Bachelor of Arts, Literature and Writing (Cum Laude)

Northern Kentucky University | 1997
