PROFESSIONAL SUMMARY

Developer Relations leader with 6+ years building and scaling developer communities from the ground up. Proven track record launching community platforms (2,000+ member Discord), migrating technical documentation, and establishing developer advocacy programs that drive adoption of API-first platforms. Deep security expertise working with CISOs and enterprise security teams on cloud infrastructure and compliance frameworks.

CORE COMPETENCIES

Developer Community Building - Technical Documentation - API Integration & Support
JavaScript/React/Next.js - Python - Go - AWS Services & Security
DevOps/CI/CD - Developer Advocacy - Technical Writing - Public Speaking
AI/ML Integration (MCP, Agentic Workflows) - Security Architecture - Compliance Frameworks

TECHNICAL CONTENT

Writing

- **Customizing Algolia React components with Tailwind classes** - Algolia Engineering Blog
- **Feature Spotlight: Trends Models in Recommend** - Algolia Engineering Blog
- **Git pre-commit validation of AWS CloudFormation templates** - AWS Management Tools Blog

Speaking & Presentations

- **AWS re:Invent 2018 - Deployment Scenarios with AWS CloudFormation**
- **Search Relevance Panel - Finding out what's best** with industry experts
- **Lightning Talk - Agentic query understanding using search MPCs**

Community Engagement

- **Live Coding Series - Adding search insights to InstantSearch applications**
 - **Fireside Chat - Lessons learned in Algolia-Hyvä integration on Magento 2**
-

RECENT PROJECTS

Video Transcription Search Application - [GitHub: algolia-samples/avsearch](https://github.com/algolia-samples/avsearch)

Full-stack demo showcasing advanced search capabilities with video content indexing and real-time search insights.

AI-Powered Developer Workflows - Implementing MCP (Model Context Protocol) and agentic workflows using n8n for automated developer support and community engagement.

PROFESSIONAL EXPERIENCE

Senior Manager, Developer Relations | Algolia - *August 2025 to present*

Lead Developer Advocate | Algolia - *August 2021 to August 2025*

Leading a cross-functional team of developer advocates, technical writers, and developer marketers supporting Algolia's API-first search platform.

Key Achievements:

- **Launched Algolia Discord Server** from 0 to 2,000+ active developers in one year, creating primary community engagement channel
- **Managing documentation migration** to Mintlify platform, improving developer onboarding experience
- **Organize and host quarterly Developer Livestream** with 200-500 concurrent attendance, driving product adoption and community growth
- **Host live coding sessions** with partners, creating product awareness by cross-pollinating user communities

Responsibilities:

- Built demo applications showcasing platform capabilities, including video transcription search solutions
 - Managed developer advocacy team and coordinated with product teams on new feature awareness
 - Created technical content strategy spanning blogs, video tutorials, and conference presentations
-

Senior Engineer, Developer Relations and Integrations | Bold Penguin - *March 2019 to August 2021*

Accelerated partner integrations with Bold Penguin's insurtech products, supporting developers from individual agencies to large enterprise teams.

Key Achievements:

- **Built comprehensive Developers Portal** streamlining partner onboarding and reducing integration complexity
- **Maintained product documentation** serving integration partners across agency and enterprise segments
- **Advocated for partner-requested enhancements** with product teams, improving API usability

Senior Developer Advocate, AWS CloudFormation | Amazon Web Services - *August 2017 to March 2019*

Served as liaison between AWS CloudFormation service team and global developer community, reporting directly to service director.

Key Achievements:

- **Represented developer community** in service team planning sessions, influencing product roadmap decisions
- **Maintained open source repositories** with active contributor community
- **Published best practices content** on AWS management tools blog with broad developer reach
- **Engaged enterprise customers** at meetups and conferences on infrastructure as code adoption

Security Solution Architect | Amazon Web Services - *April 2016 to August 2017*

Consulted with CISOs and security practitioners across North America on improving IT security posture using AWS cloud services.

Key Achievements:

- **Reviewed customer cloud network topologies** for security best practices and compliance requirements
- **Created AWS security labs** for bootcamps, summits, and loft events, training security professionals
- **Advised on security frameworks** including PCI, HIPAA, and SOC compliance in cloud environments

Senior Professional Services Consultant | Amazon Web Services - *July 2013 to April 2016*

Helped large enterprises migrate to AWS and integrate Amazon web services with existing on-premises systems, specializing in secure, repeatable deployments.

Key Projects: - **PCI-compliant infrastructure** using Elastic Beanstalk with Packer, Puppet, and CloudFormation - **CI/CD pipeline for IAM governance** using CodeCommit, CodePipeline, Ansible, and CloudFormation for regulatory compliance

EDUCATION

Bachelor of Science - Mathematics and Computer Science

Bachelor of Arts - Literature and Writing (Cum Laude)

Northern Kentucky University | 1997
